CHANGES

The policies, regulations and procedures published in this book have been established through various university processes and through the work of many student and faculty committees over the years.

Recommendations for change of any policy, regulation or procedure may originate through student or faculty governing groups, through the college councils or through the administrative offices of the university. Before submission to the President's Council for final approval, any recommended change should be discussed by the appropriate councils of the Faculty Senate, committees of the Student Senate and the Faculty and Student Government themselves. At such time as the university is not in session, the president may promulgate policies or regulations but will be responsive to subsequent suggestions for revision or review when the full campus community is available.
